NEXT-GEN B2B SAAS PLATFORM

Autonomous Recruitment & Proctoring System

End-to-end multi-agent workflow, anti-cheat security, and market-dominating killer features.

WORKFLOW PHASE 01

Company Profile & Job Details Input

Corporate Metadata

HR enters company profile, location settings, branding requirements, and criteria.

Target Skill Thresholds

Defines exact technical skills, experience floors, and required behavioral parameters.

Multi-Channel Publish

System automatically syndicates formatted job postings across selected board APIs.

WORKFLOW PHASE 02

Resume Parsing & Timezone Scheduling

AI Resume Parsing

Incoming resumes are instantly scored and mapped against job criteria via LLM agents.

Timezone Calculation

Intelligent engine auto-detects candidate timezone and presents open interview slots.

Secure Link Dispatch

Candidate confirms slot and instantly receives secure WebRTC interview room link.

WORKFLOW PHASE 03

AI Voice Interview & Anti-Cheat Lockdown

Live WebRTC Voice AI

Conversational agent conducts natural spoken interview using resume context.

Browser Lockdown

Enforces full-screen mode, blocking external AI tools, tabs, and google searches.

Gaze & Vision Tracking

`face-api.js` flags looking away or secondary persons, reducing trust score.

WORKFLOW PHASE 04

Evaluation Report & 1-Click Decision

Structured Transcript

HR dashboard aggregates voice transcripts, technical scores, and proctoring logs.

1-Click Confirmation

Recruiter reviews summary and clicks button to confirm acceptance or rejection.

Automated Email Dispatch

System automatically sends professional selection or rejection emails instantly.

KILLER FEATURE 01

Collaborative Live Coding Sandbox

In-Browser IDE

Candidates write functional code live while the AI agent observes logic in real time.

Voice-Guided Hinting

AI speaks up to nudge candidates if stuck, mirroring a senior tech lead interaction.

Automated Unit Testing

Unit tests run instantly upon submission to grade correctness automatically.

KILLER FEATURE 02

Deepfake & Audio Biometric Verification

Voice Biometric Match

Verifies speaker identity matches initial audio sample to block proxy interviewers.

Liveness Video Guard

Prevents video spoofing and blocks pre-recorded loops played into webcams.

Verified ID Certificate

Generates a zero-trust identity verification badge attached to the HR report.

KILLER FEATURE 03

Automated AI Reference Calling

Automated Reference Outreach

System automatically emails past managers listed on resume to complete voice check.

Autonomous Q&A Agent

Voice agent interviews references safely without human HR intervention required.

Credibility Scoring

Delivers a verified reference score straight to the final HR confirmation dashboard.
